

PATENT

AMENDMENTSIn the Claims

Please amend the claims as follows:

1 1. (PREVIOUSLY AMENDED) A transaction processing method utilizing an order  
2 request servicing system for routing order requests to multiple order request management  
3 systems ("ORMSs") of fulfillment partners and integrating respective ORMS data from ORMSs  
4 of each fulfillment partner, the method comprising:  
5 receiving an order request;  
6 processing the order request into multiple processed order requests;  
7 selecting fulfillment partners for each of the processed order requests;  
8 for each of the processed order requests, transmitting the processed order request to the  
9 ORMS of the selected fulfillment partner;  
10 receiving from each of the ORMSs of the selected fulfillment partners ORMS data  
11 associated with the processed order request transmitted to the ORMS of the  
12 fulfillment partners; and  
13 integrating the received ORMS data from the ORMSs of the fulfillment partners.

1 2. (PREVIOUSLY AMENDED) A system for performing the method of claim 1.

1 3. (CANCELLED)

1 4. (PREVIOUSLY ADDED) The method of claim 1 wherein the order request  
2 includes placement of an order for one or more items, each item being selected from a group  
3 consisting of a good or a service.
